EDUCATION

WCTM College, Gurgaon, Haryana

Expected 2028

Bachelor of Technology (B.Tech), Computer Science & Engineering

TECHNICAL SKILLS

Languages: C, C++, Java, Python, PHP

Web Technologies: HTML, CSS, JavaScript

Databases: MySQL, MongoDB,

APIs & Auth: REST APIs, OAuth (Google, GitHub via Supabase)

Tools & Platforms: Git/GitHub, Docker, Postman, Linux

PROJECTS

Space Biology Knowledge Engine | NASA Space Apps Challenge 2025 — 5th of 150+ teams (Graphic Era Hill University, Bhimtal)

- Our team built an AI-powered platform to explore NASA bioscience research on human adaptation to microgravity, integrating a Neo4j knowledge graph connecting 600+ research papers
- Developed Django REST APIs integrated with an AI engine to convert large-scale research data into explainable insights, with a parallel pipeline for data synchronization
- Built the frontend with React, Vite, and Three.js, including an interactive 3D visualization of the knowledge ecosystem

Cybersecurity Awareness & Defense Demonstration Platform | College Tech Fest Project

- Built an educational Python/Flask suite demonstrating security threats and defenses: password security, encrypted credential storage, phishing simulation, and image steganography
- Built a secure password generator (Python secrets module) and an encrypted password manager using Fernet symmetric encryption
- Developed a Flask-based web interface unifying the demonstrations under one controllable UI, including simulated phishing warnings for social-engineering awareness

Data Policy Compliance Agent | GDG Hackfest Hackathon

- Built an AI-driven compliance automation platform that ingests policy documents, extracts rules, scans databases, and generates explainable remediation recommendations
- Built a modular Python/FastAPI backend (policy ingestion, rule extraction, agent orchestration, violation detection, monitoring, reporting) with multi-database scanning across SQLite, PostgreSQL, MySQL, and MongoDB
- Implemented a human-in-the-loop review workflow and a Next.js dashboard, integrated with the FastAPI backend, to visualize compliance metrics, violations, and generated reports

ACHIEVEMENTS

- Secured 5th position among 150+ teams at NASA Space Apps Challenge 2025, a global 48-hour hackathon, at the Graphic Era Hill University (Bhimtal) local round
